

Priya Krishnan

Data Scientist

PROFESSIONAL SUMMARY

Data Scientist with 4 years of experience building ML models, conducting EDA, and deploying AI solutions. Proficient in Python, TensorFlow, and statistical analysis. Published researcher in NLP.

TECHNICAL SKILLS

Python, NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, SQL, Tableau, Power BI, NLP, Deep Learning, Statistical Modeling, Hypothesis Testing, A/B Testing, AWS SageMaker, Jupyter Notebooks

WORK EXPERIENCE

Data Scientist at Analytics Pro Ltd.

2021 - Present

- Built classification and regression models achieving 92 percent accuracy on production data
- Performed EDA on datasets with 10M+ records using Pandas and SQL
- Implemented NLP pipeline for sentiment analysis using BERT and Hugging Face
- Created interactive dashboards in Tableau for business stakeholders
- Deployed models on AWS SageMaker with automated retraining pipelines

ML Research Intern at IIT Madras Research Lab

2020 - 2021

- Researched deep learning models for text classification
- Published paper on attention mechanisms in NLP at AAAI workshop
- Built data pipelines using Apache Spark for large-scale experiments

EDUCATION

M.Sc. in Data Science - IIT Madras (2020)
